

Thank you for purchasing your new Top Bar Bee Hive from Happy Creatures Farms! You're going to love watching your new hive grow! Below are the assembly instructions with pictures to help.

Tools Required: You will need two wrenches and a hammer. 3/8 Wrench or adjustable pliers and wrenches will work great.

Attaching the legs:

- We recommend finding a table you can hang/place the box of while attaching the legs so they're hanging off the side of the table, it will be easier with two people.
- Each leg is marked with the letter A, B, C, or D. These markings are to be matched with the letters on the box, facing the box. The letters should be facing each other.
- First, put a washer on the bolt and insert the bolt into one of the holes. The bolts should be inserted from the inside of the box facing outwards.
- Next, place another washer on the bolt and then the nut.
- We recommend getting both bolts in place and hand-tightening before using your wrenches.

*note some holes will not exactly match those in the pictures.

Removing bottom screen cover:

- We have included a board connected to the bottom of the hive covering the screen. This board is attached with two star-bit screws.
- This board can be removed during the warmer summer month to allow for more ventilation and re-attached
